The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/528,150	Applicant(s) KAWAZOE ET AL.	
	Examiner SAHAR JAVANMARD	Art Unit 1609	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The Office Action is in response to the 371 of PCT/JP03/10728 filed August 26, 2003. Claims 1-4 are being examined on the merits herein.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Cappelli-Schellpfeffer (WO 01/70210 A2).

Cappelli-Schellpfeffer teaches methods and compositions for improving the size and appearance of a healed wound, which may be a scar such as, a hypertrophic scar, a keloid, Dupuytren's contractures, acne scars, fibrotic scars, and reactive scars.

Cappelli-Schellpfeffer teaches a method, which includes administering to an individual having a healed wound or scar a therapeutically effective amount of a cyclooxygenase inhibitor, and may include the simultaneous administration of a substance such as an antiirritant, for example, diphenhydramine, to reduce skin irritation (page 2, lines 20-27).

Note that acetylsalicyclic acid is administered to such a patient (page 3, line 25- page 4, lines 26) and is administered topically (abstract).

Furthermore, Cappelli-Schellpfeffer teaches that by "improving" the size and appearance of a healed wound or a scar is meant to alleviate, either partially or completely, symptoms such as pain, tingling, itching, burning, discoloration; reducing the size of a scar; reducing surface irregularities; reducing the accumulation of fibrous tissue; and/or partially or completely eliminating the scar (page 11, line 23- line 27).

Additionally, Cappelli-Schellpfeffer teaches the composition is used to relieve or to prevent a condition of scar irritation, in particular in a case wherein scar irritation leads to symptoms including itching, and to a patient's self-inflicted mechanical action of scratching, which can result in further scar irritation, and possible contamination and invasion of the scar with native skin organisms (page 12, line 28-page 12, line 2).

Thus Cappelli-Schellpfeffer anticipates claims 1-4.

### ***Conclusion***

Claims 1-4 are not allowed.
